Education

M. S. Ramaiah University of Applied Sciences

Bachelor of Technology in Computer Science and Engineering — 8.75 CGPA

Sep. 2023 – June 2027

Bengaluru, Karnataka

BGS PU College

Senior Secondary Education (Class XII) — 94%

Sep. 2021 – March 2023

Agalagurki, Karnataka

Sri Sathya Sai Vidya Kendra (SSSVK)

Central Board of Secondary Education (Class X) — 82%

Until May 2021

Muddenahalli, Karnataka

Experience

MyStartupWave Private Limited

Feb. 2026 – Present

Software Engineering Intern

Bengaluru, Karnataka

- Engineered full-stack features and RESTful microservices using Node.js, Express, and Python for client platforms.
- Optimized database indexing and schema models across MongoDB and PostgreSQL to enhance query response times.
- Containerized application workloads using Docker and integrated CI/CD pipelines within Agile sprint cycles.

Projects

One Swagger | React 19, TypeScript, Vite, Python, FastAPI, Manifest V3 | [GitHub](#)

2026

- Published cross-platform API testing suite (web app, Chrome extension, VS Code extension) live on the **VS Code Marketplace**.
- Built a universal OpenAPI 2.0/3.0/3.1 parser with recursive \$ref schema resolution and automated multi-language client code generator.

RPRep | React 19, Node.js, Express 5, MongoDB, Gemini 2.0, Puppeteer | [GitHub](#)

2026

- Engineered a full-stack GenAI interview preparation platform with Zod schema-enforced output for skill-gap diagnostics.
- Built a server-side PDF pipeline via headless Puppeteer and secured auth with HttpOnly cookie JWTs and MongoDB TTL token blacklisting.

Shortly | FastAPI, Next.js 14, Kafka/Redpanda, Redis, MongoDB, Docker, K8s | [GitHub](#)

2026

- Architected a distributed microservices platform featuring a FastAPI API Gateway reverse proxy, link service, and redirect engine.
- Engineered an event-driven click analytics pipeline using **Redpanda (Kafka)** and async consumers to decouple ingestion from redirects.
- Implemented **Redis** caching for sub-millisecond 302 redirect lookups and deployed live on Render with Docker and Kubernetes manifests.

Multi-Agent Research Pipeline | Python, Mistral AI, Tavily API, Streamlit, Agentic AI | [GitHub](#)

2026

- Architected an autonomous multi-agent research workflow coordinating Tavily web search with Mistral-powered reasoning agents.
- Implemented dynamic query orchestration and automated real-time web content summarization within an interactive Streamlit UI.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, C, HTML/CSS

Backend & Frameworks: FastAPI, Node.js, Express, Next.js, React, Streamlit, RESTful APIs

Distributed Systems & DevOps: Docker, Kubernetes (K8s), Apache Kafka, Redis, CI/CD (GitHub Actions), Microservices, System Design

Databases: PostgreSQL, MongoDB, Redis (In-Memory Cache & Key-Value Store)

Developer Tools: Git, GitHub, VS Code, Linux/Bash, Postman, Chrome & VS Code Extension Development

GenAI & Agentic AI: Google Gemini API, Mistral AI, Multi-Agent Workflows, Prompt Engineering, Pydantic, Zod

Certifications & Professional Development

IBM AI Engineering Professional Certificate — Coursera (*Pursuing*)

IBM Cloud Computing & DevOps Professional Certificate — Coursera (*Pursuing*)

DevOps on AWS Specialization — Amazon Web Services on Coursera (*Pursuing*)

Python for Everybody & Data Structures Specialization — University of Michigan, Coursera
